

PURDUE LUNABOTICS

26–27 SPONSOR PACKET

PURDUE LUNABOTICS

Purdue Lunabotics is a student-run engineering team at Purdue University that competes annually in one of NASA's Artemis Student Challenges: the Lunabotics Challenge.

Our mission is to advance space robotics by designing and building autonomous and remote-controlled lunar rovers capable of mining on the Moon.

Beyond technical development, Lunabotics offers members opportunities to grow professionally through sponsor networking events, outreach, and community service.

PURDUE LUNABOTICS

Each year, our team of over 100 students representing over 15 majors work to develop a lunar excavation rover entirely in-house, designed to mine, transport, and deposit lunar regolith under real-world constraints.

We have consistently placed in the top 10, in both specific categories (Autonomy, Outreach, Systems Engineering, Presentation), and overall performance. At competition, we have hosted round table seminars on subjects like Autonomy and Battery usage.

PURDUE LUNABOTICS

Our team's success depends on the generous support of our sponsors. Every achievement is made possible by those who invest in the next generation of engineers.

By sponsoring Purdue Lunabotics, your brand will gain visibility through our robot, publications, and online presence. As a team representing Purdue, we proudly showcase our sponsors at events across campus and the global community year-round.

PURDUE LUNABOTICS

Sponsorship benefits include

- Sponsored content on social media
- Professional product use photos
- Invitations to design reviews
- Company logo on robot and website
- Guided or virtual tours of our workspace

Donations are desired in any form available for your company. Financial donations, product donations, discounts, or time-given-to-our-team are all valid and accepted forms of donation, would be greatly appreciated, and recognized with all benefits listed above.

PURDUE LUNABOTICS

As a student organization that does not charge members dues, we rely heavily on the generous support of sponsors.

Our purpose is to build well-rounded engineers and developers who are capable of learning more than what a class teaches them. You will help us develop new ideas that lead to immense growth for everyone involved.
