

Purdue Lunabotics

Constitution and Bylaws

Created: 04/03/2014

Updated: 05/26/2026

ARTICLE I: Name

The name of this organization is Purdue Lunabotics, informally referred to as “Lunabotics.”

ARTICLE II: Purpose

NASA’s Artemis program will establish humanity’s first long-term presence on the moon, paving the way for future deep space exploration. NASA initiated the Lunabotics Program—where teams build a robot capable of performing tasks on a simulated lunar surface—to educate and inspire students in STEM. Purdue Lunabotics aims to support these goals of education and inspiration while simultaneously upholding Purdue University’s longstanding heritage of excellence in aerospace by enabling students to contribute to the experience of designing and fabricating an autonomous and remote-controlled lunar rover. As a Professional Development Club, Purdue Lunabotics also works to provide its members with the skills to launch successful careers and the networking to connect with leading engineering companies.

ARTICLE III: Definition of Membership

Section A: Definition of Eligibility

To be eligible to join Purdue Lunabotics, a student must:

- Currently be an undergraduate or graduate at Purdue University (West Lafayette or Indianapolis campuses).
- Strive to build a cooperative community aimed towards bettering their own skills and those of other members while furthering robotics research and development.
- Be in good standing with Purdue University policies, regulations, and standards.

Section B: Definition of Active Membership

To remain an active member of Purdue Lunabotics, There are two options

Option 1:

- Attend at least one (1) club-sponsored non-social event per academic year. These events may include STEM outreach, professional development, recruiting, etc.
- Attend at least 40% of general meetings per semester

Option 2:

- Attend at least 70% of general meetings per semester

In addition, all members must

- Remain in good standing with Purdue University policies, regulations, and standards.

Only active members of Purdue Lunabotics are eligible to attend the trip to competition, appear in the official team photo, run for an officer position, participate in elections, and have their name on the list of official members sent to NASA. Active members currently on co-op or absent due to extenuating circumstances (i.e. illness or other health condition, military leave, bereavement, etc; these will be determined by the Leadership Team on a case-by-case basis) are exempt from these requirements for the time period during which they are not able to attend events and meetings. Active Membership may be granted to any member by a majority vote of the Leadership Team. Active Membership requirements may be adjusted by a majority vote of the Leadership Team

Section C: Revoking Membership

An active club member shall be subject to expulsion if they do not abide by this Constitution as well as by Purdue University policies, regulations and standards. The process for membership to be revoked is as follows: a concern form must be filed (the concern form shall always be readily available and accessible to all members), following which a Leadership Meeting shall be conducted to discuss the concern, and concluding with a vote regarding the member. The member in question must be presented with the opportunity to provide their full perspective prior to any voting. A 51% majority vote conducted by the full Leadership Team (see Article V, Section A for a definition of the full Leadership Team) during this meeting is required to revoke membership.

Active members who have had their membership revoked are ineligible to become active members again unless a 51% majority vote of the full Leadership Team reinstates membership eligibility. Any member may request such a vote at most once per semester and must be presented the opportunity to provide justification for reinstatement of eligibility. Any non-active member may have their participation in any Purdue Lunabotics event prohibited by a 51% majority vote of the Executive Leadership team.

ARTICLE IV: Hazing and Discrimination

Purdue Lunabotics complies with all State and Federal laws as well as the Purdue University Hazing Policy (see the University Regulations for more information). Furthermore, members of this organization understand that any individual or group found responsible for hazing shall be subject to disciplinary action by the Office of the Dean of Students.

Membership and participation are free from discrimination on the basis of race, religion, color, sex, age, national origin or ancestry, genetic information, marital status, parental status, sexual orientation, gender identity and expression, disability, or status as a veteran.

ARTICLE V: Officers

Section A: List of Officers by Title

The Executive Leadership Team will be comprised of the following:

- President
- Vice President
- Treasurer
- Chief Engineer
- Business Operations

The President, Vice President, and Chief Engineer must be a single officer; Treasurer and Business Operations may be one officer alone or two officers acting as co-leads.

The full Leadership Team consists of this Executive Leadership Team along with the Subteam Leads (which are leads for each of the subteams that exist within the club at any given point in time).

Section B: Officer Eligibility

Any student who has been an active member of Purdue Lunabotics for a minimum of one (1) semester is eligible to be an officer. Any individual may secure at most one (1) Executive Position and are then ineligible to be appointed as a Subteam Lead. Potential exceptions can be permitted with the approval of a two-thirds vote by the full Leadership Team and a 51% majority vote by the members present at the time of the vote. Officers, as well as any member running for an officer position, must not be on academic probation in the eyes of Purdue University.

Section C: Length of Officer Term

All leadership positions are elected/appointed at the end of the spring semester and serve a one-year term. The President and Vice President must be available (virtually or in-person) for the following semester after leaving the position to serve as a mentor for new leadership. It is not required for Subteam Leads to be available for a semester after completing their term.

Section D: Election Procedure

Prior to the election, all candidates must publicly declare their intent to run; the ballot must be closed and finalized prior to the start of the election. Elections will consist of presentations followed by questions from the rest of the assembled membership of the team. Candidates will then vacate the room, and the team will conduct a discussion on the merits of each, followed by voting (via a digital voting method so that some form of record is available post-election if necessary; however, the record will not be made publicly available to the general team). A candidate must receive the plurality vote of the active members present at the time of the vote to secure the position. Candidates shall not vote during this process. If a candidate secures the vote, they must accept the position unless an extenuating circumstance occurs; this may include sudden illness or bereavement, as well as other additional scenarios that shall be considered

on a case-by-case basis by the Executive Leadership team. In the event of a tie, a runoff election will occur no more than two weeks after the initial election. This will consist of a question session, in which the Executive Leadership team provides a series of pre-submitted questions to the candidates. Members may ask follow-up questions, but may not make any inquiries on non-related topics. Questions will be followed by a discussion and vote, during which the candidates may not be present in the room. A candidate must have a majority of the active members present to secure the vote. If a candidate runs uncontested but does not receive a 51% majority, a runoff election is also conducted in a likewise manner; however, the floor will also be opened to other members who may want to run.

Section E: Appointment Procedures

Incoming Subteam Leads (for the following year) are appointed by the incoming Chief Engineer and President. There is no restriction on the number of Subteam Lead positions any individual may hold, nor is there a limit on the number of individuals that may be appointed for any Subteam Lead position.

Section F: Officer Removal

Following a similar procedure to general member removal as defined in Article III, a member of the Leadership Team (including all Executive Leadership positions as well as Subteam Lead positions) can have their leadership role revoked based on investigation of a filed concern (via the same Concern Form referenced in Article III) regarding behaviors that do not abide by this constitution and/or by policies, regulations, and standards of Purdue University. After a concern form is filed, a meeting is called of the Leadership Team (without the presence of the lead who the concern has been raised against) to discuss the concern and conduct a vote. The lead in question must be presented with the opportunity to provide their full perspective prior to any voting. A 51% majority vote is required to revoke the lead's position. If the lead's position is revoked, they will still remain a member of the team, unless the Leadership Team determines that further action is necessary; revoking membership and revoking a leadership position are separate processes.

Section G: Officer Vacancy

In the event that an elected (i.e. Executive) position becomes vacant, the full Leadership Team will hold a vote to select an interim to hold the position until an official vote can be held. The interim lead can be an active general member or a member of the Leadership Team and must be appointed with a majority vote. The process for then electing a new lead to the vacant position will proceed similarly to a runoff election, where the position will be opened for member nominations. Questions will be pre-submitted to the Executive Leadership Team, who will then pose as a panel before the individual candidates, followed by a discussion and voting. The candidate (or set of candidates in the case of co-leads) must receive a majority of active members' votes to secure the position.

In the event that an appointed position becomes vacant, the President and Chief Engineer will appoint a new lead to serve the remainder of the term.

ARTICLE VI: Officer Duties

Section A: President

The President is the final administrative authority of Purdue Lunabotics. The President shall set the team's directions and goals, and is responsible for ensuring that team deliverables are produced on time as well as submitting team deliverables as necessary. Additionally, the President shall represent Purdue Lunabotics to the broader Purdue community. Following the President's leave of position, they must support the incoming president either virtually or in-person during the following semester. Along with the Chief Engineer, the President shall appoint Subteam Leads.

Section B: Vice President

The Vice President shall aid the President, and in the event that the President is unable to fulfill necessary duties, the Vice President shall temporarily stand in. The Vice President is responsible for managing outreach and facilitating social events within the club.

Section C: Treasurer

The Treasurer(s) shall deal with and process all reimbursement requests, create the team budget and keep it up-to-date, and manage all Purdue Lunabotics funds. This includes being the primary officer responsible for procuring funds. The Treasurer(s) shall also keep accounts, deposit the organization's funds, and make expenditures in a manner approved by the Business Office for Student Organizations.

Section D: Chief Engineer

The Chief Engineer is responsible for the technical aspects of Purdue Lunabotics. As such, the Chief Engineer shall uphold and enforce procedures and integrity for all design, manufacturing, and testing of the robot and various additional engineering projects the team conducts. Along with the President, the Chief Engineer shall appoint Subteam Leads.

Section E: Business Operations Lead

The Business Operations Lead(s) shall assist the Treasurer(s) in building and managing corporate relations. They will also direct team marketing and advertising, particularly via social media platforms. The Business Operations Lead(s) shall also manage merch designs and orders.

ARTICLE VII: Advisor

Purdue Lunabotics has one (1) advisor, who shall not vote or hold office within the organization. The advisor for Purdue Lunabotics can be changed if the advisor does not wish to continue, or if a 51% majority vote for removal is conducted by the full Leadership Team. A new advisor must be instated via a two-thirds majority vote by the full Leadership Team. An advisor is initiated at the end of the spring semester and serves a one-year term. Purdue Lunabotics will select and secure an advisor from the active faculty or staff of Purdue University and will annually register their name with the Student Activities

Office. The advisor will be informed of all meetings and activities of the organization and may call a special meeting of the organization to discuss concerns for the ongoing nature of the organization.

ARTICLE VIII: Amendments

All amendments to this Constitution and Bylaws are subject to the approval of the Purdue Student Activities and Organizations Office. They MAY NOT take effect until they have been approved. An amendment proposal must first be submitted to the Executive Leadership team. After a minimum duration of one (1) week following the proposal, an election to ratify amendments will then be held by a vote with a quorum of the membership. A two-thirds majority approval from all present active team members is required to pass the amendment.

ARTICLE IX: Dissolution

Dissolving the club means Purdue Lunabotics will cease to exist as a student organization. Dissolution of Purdue Lunabotics requires a unanimous decision from the Executive Leadership Team in addition to a 90% vote of the active members of Purdue Lunabotics. In the event of dissolution, the President shall contact Student Activities staff to notify them of the club's dissolution. All assets and debts remaining will be handled by the Executive Leadership team.
